Compliance Required - EAR, ITAR, CTPAT, AES, FTA's and ATF

Export Regulations Compliance and Controls are required of every exporter. Jurisdiction covers all U.S. exporters and their subsidiaries. Regulations to comply with include EAR, ITAR, AES, FTR, FTA, ATF, CTPAT, FCPA, Encryption Compliance and Conflict Minerals. ***We support all these compliance efforts!***

All Military applications require a license. Tech data is of special concern.

When commercial products are manufactured with certain technology or components draw upon these areas of manufacture, they may in fact be subject to EAR regulations. The areas of manufacture that are subject to control include:

nuclear materials • chemical or biological materials • toxins • electronics • computers, (including software and technology) telecommunications • information security lasers and sensors • navigation equipment • avionics marine and space or propulsion systems.

Two methods to contract with us. Pay as you go or retained services.

Just \$575 per month covers all or pay as priced.
